

Advanced Technology Center

Nelson Electric's engineering staff works from our Advanced Technology Center, located at our headquarters. ATC is dedicated to the support, training and development of advanced technologies offered by some of our key vendors like Rockwell Automation and SMC Corp. of America.

- Our engineers bring experience and knowledge. They have over 90 combined years at Nelson Electric.

Each engineer has at least one primary area of expertise

Eric Heide	Rockwell software
Carmen Pillizzi	Engineering manager; programmable controllers and operator interface
Dave Whitt	AC and DC drives
Jeff Genac	Sensors, industrial control and safety products
Jon Flick	Programmable controllers, operator interface and bar code scanners
Peter Landgraf	Pneumatics

- The ATC group offers scheduled technical training seminars in several key subjects that directly correlate to Rockwell Automation technology. They can also conduct specialized training for your company.
- Our engineers give free technical support and many additional services to our customers. Over the phone or in person, consulting and guiding, they do what it takes to get the job done right.

- Our engineers don't stop learning. They frequently attend schools and seminars to keep abreast of the newest developments and product offerings.

Dedicated to providing the best in services and capabilities to our customers
