

# Inventory

Many companies reduce their investment in inventory at the expense of customer service. That is not our philosophy. We continue to invest in our large local inventory. Our goal is to have what you need, when you need it.

In addition to keeping our shelves full we offer inventory-related services:

We are willing to stock any product you need – even specialty items. All we need to know is how often you buy it and in what quantities.

We listen. Is there a product line or a family you think we should stock? Please tell us.

### Single Sourcing

- Looking to reduce suppliers? We are willing to find and procure any brand, of any quantity – even if it is not electrical.

### Scheduled – Just in time.

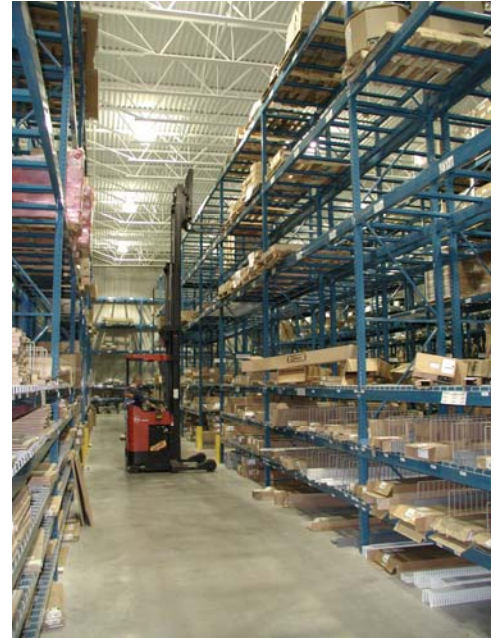

- We can meet production requirements. Many manufacturers depend on us to maintain a smooth, unbroken flow of inventory.
- We offer predictive analysis for your production purposes.

### On Site Inventory Management programs

- Need assistance with your own inventory? We provide a variety of on-site services, including parts management, inventory assessment, ordering, put away to cycle counting.
- We will configure a plan to meet your needs.

### Fill rate analysis.

- We continually analyze our service level to insure that we perform at the level you expect.

*Dedicated to providing the best in services and capabilities to our customers*
